

370

Frozen Beverage Freezers

Model 370

Standard 6 & 18

LISTED

Features

Dispense a variety of frozen beverages, such as granita drinks, frozen cocktails, fruit juices, smoothies, iced coffees and slush. May also be operated in chilled drink mode.

Removable Bowls

Clear bowls are marked with gallon and litre gradations. Each bowl holds 10 litres.

Viscosity Control

Automatically shuts down refrigeration when product reaches desired thickness.

Temperature Control

Adjustable thermostat allows the operator to use the unit in frozen or chilled drink mode.

Beater

Single piece beater includes inner scraper

Self Closing Draw Handles

Spring operated dispensing handles close automatically for self service application.

Removable Drip Tray

Drip tray is easily removable for cleaning. Diaphragm plug in base of tray may be perforated to connect a drain line.

Lighted Display

Domed covers are Lit. Set of five interchangeable flavour cards are included. May be positioned front or back depending on merchandising preference. No cord required.

Defrost Timer

May be preset to automatically go into chilled drink mode during no sale periods.

Condenser Filter

Improves ventilation for optimum performance by preventing dust from accumulating on the condenser(s). No tools are required to change or replace the washable filter.

Continuing research results in steady improvements; therefore, these specifications are subject to change without notice.
